

MODULE TITLE

Learner Program Outcomes:

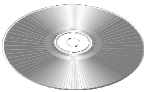

1. *List each of the Learner Program Outcomes addressed by this module.*
- 2.
- 3.
- 4.
- 5.

Prerequisites:

Identify any previous courses, modules, or lessons that should have been completed before starting this module.

Total Teaching Time: *Identify the approximate length of the entire module.*

Lesson Plan Titles: *List each lesson developed for this module.*

Gold CD Pre-Activity: *This activity is included at the beginning of each module where appropriate to help the teacher identify students already accomplished in technical application or foundation skills being taught.*

- 1) *Encourages peer-to-peer mentoring*
- 2) *Develops leadership qualities of advanced students*
- 3) *Provides support for teacher/students not as familiar with computer or application*

Module overview:

This section of the Module Plan is designed to also be a handout for the students if the teacher chooses. Explain the background upon which the module and lessons were prepared. Provide as much information as possible to excite the students about the upcoming activities and how they can relate them to real-life situations.

Outside readings and other resources:

List any additional reading material that will enhance the entire module for both teacher and students. Additional resources that may not be necessary for fulfilling the requirements of the individual lessons but would offer greater insight into the learning activities covered in the module.
